⁴ In addition to the Flat Rate fee, permit fee will be adjusted should there be an increase in floor area.

4. Miscellaneous charges

If the work regulated by the permit cannot be described otherwise, the permit application fee shall be \$16.25 for each \$1,000.00 value of the work proposed.

5. Interpretations

The following explanatory notes are to be observed in calculation of permit fees:

Floor area of the proposed work is to be measured to the outer face of exterior walls and to the centre line of party walls or demising walls (excluding residential garages).

In the case of interior alteration or renovations, area of proposed work is the actual space receiving the work (i.e. tenant space).

Mechanical penthouses and floors, mezzanines, lofts, habitable attics, and interior balconies are to be included in all floor area calculations.

Unfinished basements for single detached dwelling (included semi, duplexes, and townhouses, etc.) are not included in the floor area.

Attached garages and fireplaces are included in the permit fee for single detached dwellings and attached dwellings.

Where interior alterations and renovations require relocation of sprinkler heads or fire alarm components, no additional charge is applicable.

Ceilings are included in both new shell and finished (partitioned) buildings. The Service Index for ceiling applies only when alterations occur in existing buildings. Minor alterations to existing ceiling to accommodate lighting or HVAC improvements are not chargeable.

Where demolition of partitions or alteration to existing ceilings is a part of an alteration or renovations permit, no additional charge is applicable.

Corridors, lobbies, washrooms, lounges, etc. are to be included and classified according to the major classification for the floor area on which they are allocated.

The occupancy categories in the Schedule correspond with the major occupancy classification in the Ontario Building Code. For mixed occupancy floor areas, the Service Index for each of the applicable occupancy categories may be used, except where an occupancy category is less than 10% of the floor area.

For Rack Storage use, apply the square footage charge for industrial for the building.

Where an inspection request is premature and the inspector must re-attend the site to complete the necessary inspection, upon notice to the owner an addition fee of \$141.00 is charged.
